ADHD BUDGET PLANNER · QUICK-START GUIDE

PixoraaGoods ADHD Budget Planner: Quick-Start Guide

Your Money, Made Simpler.

Thank you for your purchase! This guide takes about 5 minutes to read. You don't need to do everything today: start with what you know.

---

1. What you receive

- **Access to the PixoraaGoods ADHD Budget Planner web app**, at the link below. It runs in your web browser and can be installed like an app on your phone, tablet or computer.
- **This Quick-Start Guide** (PDF), which covers setup, installing, offline use, backups, privacy and troubleshooting.
- **A personal-use licence** (at the end of this guide).

Your app link: `[YOUR-APP-LINK]`

There's no account to create, no subscription and no bank connection. This is a digital product: nothing physical will be shipped.

---

2. Getting started (3 small steps)

1. **Open your app link** in Chrome, Safari, Edge or Firefox.
2. **Follow the guided setup.** It asks about your currency, pay schedule, bank balance, savings, debts, goals and bills. Every question is optional, and "Use example values" is there if you're unsure. You can run it again later from **Getting Started**.
3. **Bookmark or install the app** (see section 3) so it's one tap away.

Then, each day or week:

- Tap **+** to add an expense. It takes a few seconds.
- Check **Safe-to-Spend** before you spend.

- Mark bills **Paid** when you pay them. Nothing is marked paid automatically.
- Update your **bank balance** every week or two to keep things accurate.

3. Install it as an app

Device	How
iPhone / iPad (Safari)	Open the link → tap **Share** → **Add to Home Screen** → **Add**
Android (Chrome)	Open the link → tap ⋮ → **Install app** (or **Add to Home screen**)
Windows / Mac (Chrome or Edge)	Click the **Install** icon in the address bar, or the menu → **Install PixoraaGoods Budget**
Firefox on desktop	Installing isn't supported, so use it in a normal tab and bookmark it

You can also go to **Settings → Install the app** inside the planner.

4. Using it offline

- After you've opened the app **once while online**, it opens without internet in the same browser or installed app.
- Everything you add offline is saved on your device straight away.
- When a new version is available, you'll see **"A new version is ready. Update now."** Your data stays the same.

5. Where your data lives (privacy)

- Your financial information is stored **only in your browser on your device**. It is never uploaded to PixoraaGoods or anyone else.
- There is **no bank connection, no account, no ads and no tracking** inside the app.
- The hosting provider sees normal technical web requests when the app's files are downloaded. Your budget data is never part of them.

Important limits of browser storage:

- Data **doesn't sync** between devices or browsers. Your phone and laptop keep separate data.
- **Clearing browsing data / site data**, using **private or incognito** windows, or **uninstalling** the app can delete your data.

- On iPhone/iPad, Safari may remove data for websites you haven't used for a few weeks. Installing the app to your Home Screen and keeping backups is the safest choice.

---

6. Backups (please do this!)

Make a backup: Settings → **Export full backup (.json)**. Save the file somewhere safe (cloud drive, email to yourself, USB). A monthly backup is a good habit.

Restore a backup (or move to a new device): open the app on the new device → Settings → **Import a backup…** → choose your file → check the summary → **Replace my data**. You can press **Undo** straight after.

Spreadsheet copy: Settings → **Export transactions (.csv)** opens in Excel, Numbers or Google Sheets.

---

7. How Safe-to-Spend works

Safe-to-Spend = **money available now** − **bills due before your next payday (or month end)** − **savings you planned but haven't moved yet** − **other money you've set aside**.

- "Money available now" is the bank balance you typed in, plus income received, minus spending, savings transfers and debt payments you've logged since then.
- **Expected paychecks are never counted** until you mark them received.
- Moving money to savings is a **transfer, not spending**.
- If information is missing (like your bank balance), the app tells you what to add instead of guessing.

8. Troubleshooting

Problem	Try this
My data is gone	Did you use a different browser, a private window, or clear site data? Open the app where you used it before, or import your latest backup.
Numbers look wrong	Update your bank balance (Safe-to-Spend → Update balance). Check for duplicate expenses or bills that aren't marked paid.
Expected paycheck still shows after I got paid	Record it: Paycheck Planner → **Mark received** (or Income → Record income and link it to your regular income).
The app won't open offline	Open it once online first, in the same browser or installed app.
I don't see "Install"	Use Chrome/Edge on Android or a computer, or Safari's Share → Add to Home Screen on iPhone. Firefox desktop can't install apps.
The screen looks old after an update	Tap **Update now** on the green banner, or close and reopen the app.
Something else	Message us on Etsy (below). Please include your device, browser and a screenshot. **Never send your backup file or bank details.**

9. Support

Questions or problems? Send a message through **Etsy → Purchases → Contact shop** and we'll do our best to help. Please don't share passwords, bank details or your backup files in messages.

10. Personal-use licence

- This licence lets **you** (one person or one household) use the PixoraaGoods ADHD Budget Planner for personal budgeting.
- You may **not** share, resell, redistribute or publish the app link, the app, this guide or any part of them, or use them to create a competing product.
- The app is provided "as is". It's an organisation tool, not financial, tax, legal or medical advice, and it does not diagnose or treat ADHD. You are responsible for your financial decisions.
- **Hosting:** the app link is hosted by PixoraaGoods. We intend to keep it available, but we can't guarantee it forever. Because your data lives on your device, regular backups keep it safe whatever happens to the link.

- Future updates are not promised. If we release an update to the hosted app, you'll get it automatically.
